

INDEX

- additive complexity 151, 152
- affine coordinates 120
- affine definable space 157
- affine function 26
- affine independent 119
- affine map 126
- affine span 119
- affine subspace 119
- Artin, E. 8, 21,
- Aschenbrenner, M. vii
- asymptotic direction 118
- atom 12
- attaching 165

- barycenter 120
- barycentric coordinates 120
- barycentric subdivision 123, 129
- basic function 21
- basic relation 21
- basic semilinear set 26
- Benedetti, R. vii, 7, 8, 41, 141, 150-152, 154
- Bierstone, E. 8
- Bochnak J. 8, 41, 106
- boolean algebra 2, 12
- Borel set 1, 16
- boundary x , 18
- bounded 95
- Bourbaki, N. 106
- box 17
- Brown, A. 8, 41, 118
- Brumfiel, G. 8, 106, 118, 155, 168

- Cantor set 1
- Cantor's paradise 1
- Cantor space 1
- Carathéodory, C. 126
- C^1 -cell 114
- C^1 -cell decomposition 115
- C^1 -map 111, 114
- C^k -cell 116
- C^k -map 116
- C^k -cell decomposition 116

- cell 3, 50, 51
- cell decomposition theorem 4, 49–57
- Chang, C. 8, 29
- chart 156
- Chervonenkis, A. 91
- Chevalley's constructibility theorem 13, 34, 76
- closed complex 121
- closed multivalued function 128
- closure x , 2, 15, 17
- codomain ix
- compatible ix, 127
- completable 102, 159
- completion 163
- complex 121
- cone 149
- conjunction 11
- constant 21
- constant symbol 22
- constructible set 13, 76
- continuity of roots 32
- convex 17, 120
- convex hull 120
- Conway's field of surreal numbers 8
- Coste, M. 8, 41, 106, 154
- curve selection 93, 94, 97

- decomposition 51, 52
- decomposition above 38
- decreasing 16
- definable additive map 28
- definable atlas 156
- definable choice 94
- definable collection 5
- definable contraction 134, 135
- definable curve 102, 159
- definable equivalence relation 94, 97
- definable family 5, 59
- definable function 3, 19, 156
- definable homeomorphism type 133
- definable homotopy 134
- definable map 3, 18, 22, 158
- definable partition of unity 102
- definable path 100

- definable point 22
- definable quotient 161–168
- definable retraction 135
- definable set 3, 18, 22, 43, 156
- definable set of representatives 94, 97
- definable Skolem functions 94, 106
- definable space 155–161, 168
- definable strong deformation
 - retraction 135
- definable subspace 158
- definable trivialization 142, 147
- definable using constants 22
- definable using parameters 22
- definably connected set 19, 51
- definably connected component 57
- definably contractible 134
- definably equivalent sets 7, 132
- definably homeomorphic sets 133
- definably identifying map 104
- definably proper map 104
- definably proper over 166
- definably proper quotient 162
- definably trivial map 7, 142
- definably trivial over 142, 147
- Delfs, H. 7, 8, 106, 138, 154, 168
- Delzell, C. 41, 106
- Denef, J. 8, 77
- dense 17
- dependent 82, 84
- dependency index 83
- derivative 12, 107, 108
- descriptive set theory 16
- Dieudonné, J. 138
- differentiable 107, 108
- dimension 5, 63–69
- disjoint sum 164
- disjunction 11
- division ring 20, 28
- domain ix
- Dudley, R. 84, 91
- Efroymsen, G.** 8, 41, 173
- embedded homeomorphism type 149
- embedded definable homeomorphism
 - type 149
- equivalence of definable atlases 156
- Esquisse d'un Programme vii, 8, 9
- Euler characteristic 5, 69–76
- existential quantification 11
- expansion 23
- extreme point 120
- face** 120, 128
- family ix, 5
- fewnomial 150
